

Dropship Light 3PL

Wholesale 3PL private-label supplement fulfilment · 10-unit MOQ

Nutribl are delighted to be able to offer a 'dropship-light' wholesale 3PL model to clients. Wholesale 3PL gives you access to all of our supplements at a very low MOQ (10 units per product). You will have control over your inventory, benefit from attractive start up and increasing profit margins and have access to direct platform ecommerce integrations.

Please note: We are UK based and mainly service the UK market. Whilst our 3PL partner can service overseas orders, you need to consider that delivery times will be slower. This should be discussed directly with the 3PL provider.

Getting started

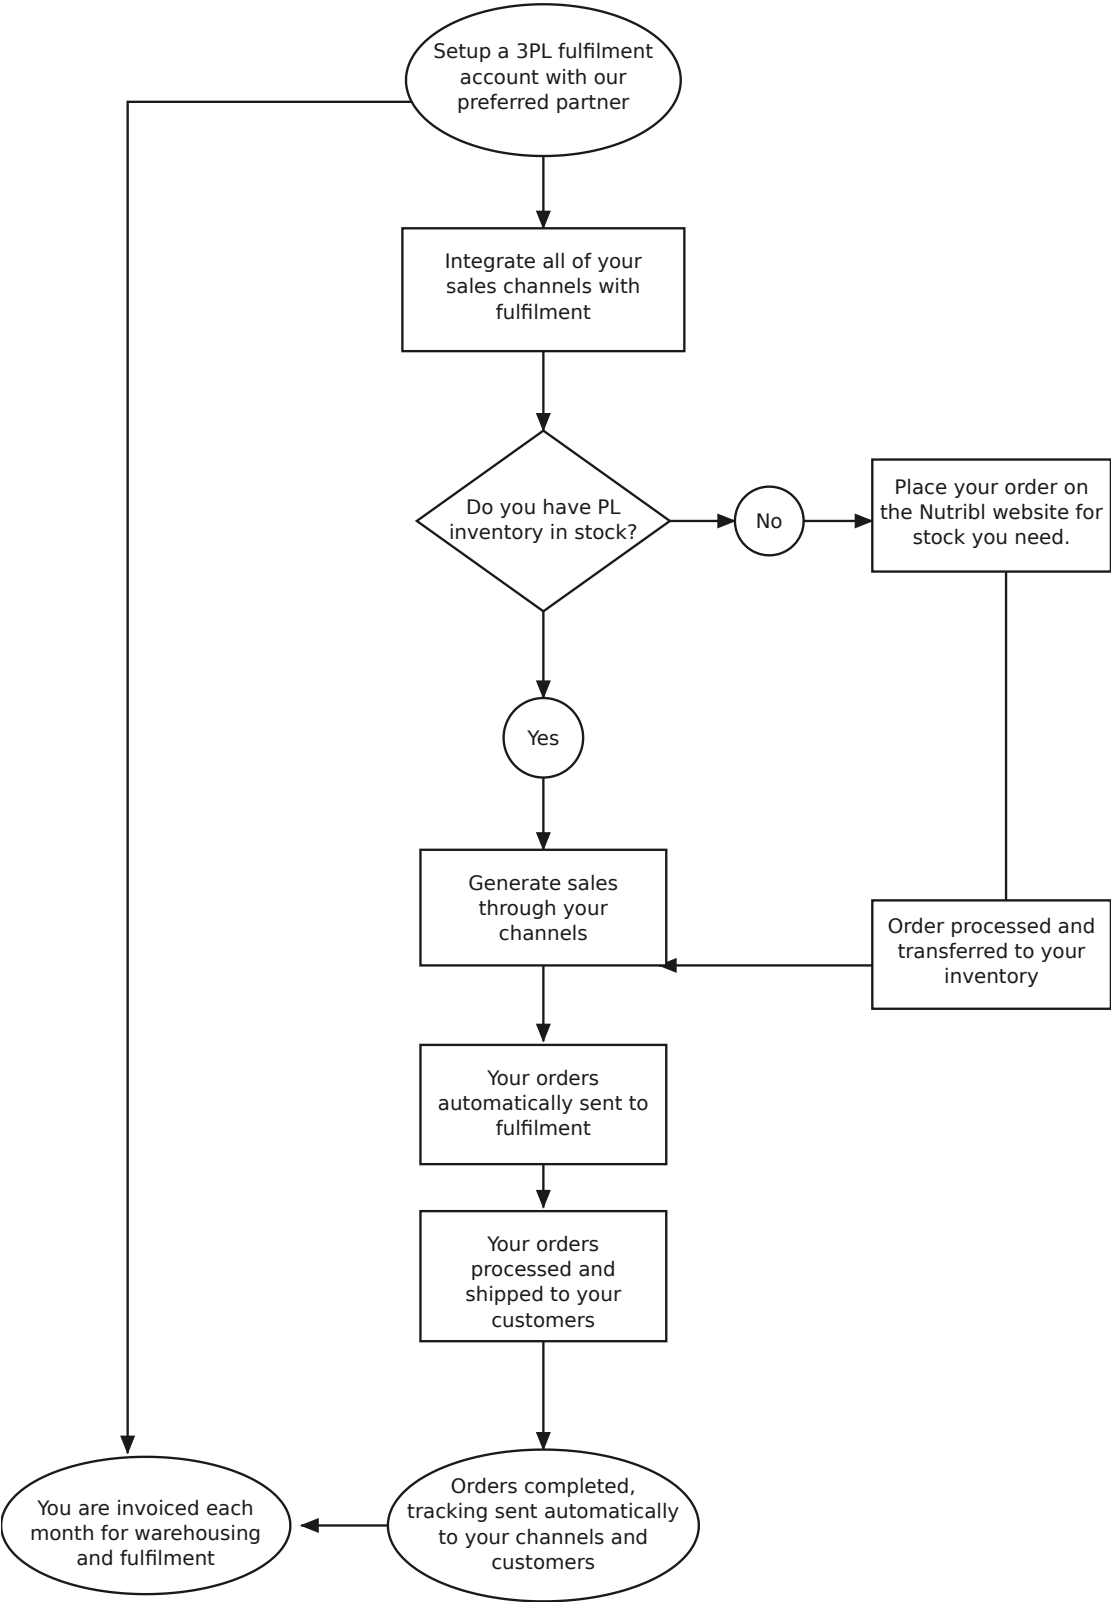

To get started with launching your new private label supplement range all you need are label designs for the products you wish to promote. You can either have your own designer create labels or have Nutribl do it for you — see the Nutribl label design page to discover how.

To then take advantage of Nutribl's dropship-light service you just need to follow 5 easy steps:

- 1 Send us your details**
Send us your details so we can assess your requirements — apply now by sending us your details to hello@nutribl.com.
- 2 Set up with the 3PL partner**
We will send you an outline of how the service works and details of how to get set up. If agreeable, set up an account with our 3PL fulfilment partner.
- 3 Order your private label stock**
Order your private label stock from Nutribl. We print and add your branded labels to your supplements and pass them to the 3PL fulfilment service, who store your products awaiting your sales. You will need an account with Nutribl and have artwork uploaded to your account for any products you want to order.
- 4 Advertise and sell**
Advertise your own brand private label products at a price you control. Generate sales through your sales channels — e.g. your own website, TikTok, Amazon, eBay, Facebook, flyers, newsletters — whichever channels suit your business model.
- 5 Orders are fulfilled for you**
When your customers place orders you take their payment; these orders are then processed and dispatched from your stock held by the 3PL fulfilment service.

Scale your business quickly by leveraging your increasing customer base for repeat orders, cross-sells and referrals.

How the 3PL workflow runs

Dropship Light 3PL workflow — redrawn from the flowchart on the Nutribl page.

Benefits of Dropship Light

1. Minimal capital investment

With a MOQ of 10 units per SKU only a small investment is needed.

2. Effortless integration

Direct connection with your existing sales channels, automating order collection and processing, so you can focus on growing your brand without worrying about logistics or admin. You don't have to worry about:

- Managing or organising warehouse space
- Packing and shipping your orders
- Tracking inventory
- Handling returns and inbound shipments

All of this is organised by your 3PL fulfilment partner.

3. Fast & reliable shipping

Orders are picked, packed, and dispatched quickly, ensuring your customers receive their products without delay.

4. Automatic tracking updates

Tracking details are automatically transferred back to your sales channels when orders are shipped, providing your customers with real-time updates without you doing anything.

5. Flexible warehousing

The warehousing facilities are equipped to store your supplements safely and efficiently, allowing you to scale your inventory as your business grows.

6. Scalability

As your business grows we offer a tiered pricing structure. As you hold more stock the price comes down and your profits go up.

7. Mobile

You can run a dropship light business from just about anywhere, as long as you are able to communicate with suppliers and customers easily. Many successful dropship light businesses are home-based, requiring little more than a laptop and an internet connection.

8. Ready-made selection of products to sell

You can add additional products to your brand at any time, only needing the investment for 10 single units at a time. Nutribl continually expand the range to test new markets, so you will always have opportunities to add new revenue streams.

9. Easy to test

Exploring new markets and sales channels is made simple with such low MOQ. There is virtually no risk to testing new products and quickly finding what works for your business.

10. Customer satisfaction focused

By providing accurate fulfilment and prompt shipping, you enhance customer satisfaction, build trust, and improve brand loyalty.

Sales channel & marketplace integrations

The integrations graphic on the page shows direct connections with the following channels and platforms:

Amazon	B&Q	BigCommerce	Bluepark
ChannelAdvisor	CubeCart	Debenhams	eBay
